Note to teachers and students on the use of published marking schemes

Marking schemes published by the State Examinations Commission are not intended to be standalone documents. They are an essential resource for examiners who receive training in the correct interpretation and application of the scheme. This training involves, among other things, marking samples of student work and discussing the marks awarded, so as to clarify the correct application of the scheme. The work of examiners is subsequently monitored by Advising Examiners to ensure consistent and accurate application of the marking scheme. This process is overseen by the Chief Examiner, usually assisted by a Chief Advising Examiner. The Chief Examiner is the final authority regarding whether or not the marking scheme has been correctly applied to any piece of candidate work.

Marking schemes are working documents. While a draft marking scheme is prepared in advance of the examination, the scheme is not finalised until examiners have applied it to candidates' work and the feedback from all examiners has been collated and considered in light of the full range of responses of candidates, the overall level of difficulty of the examination and the need to maintain consistency in standards from year to year. This published document contains the finalised scheme, as it was applied to all candidates' work.

In the case of marking schemes that include model solutions or answers, it should be noted that these are not intended to be exhaustive. Variations and alternatives may also be acceptable. Examiners must consider all answers on their merits, and will have consulted with their Advising Examiners when in doubt.

Future Marking Schemes

Assumptions about future marking schemes on the basis of past schemes should be avoided. While the underlying assessment principles remain the same, the details of the marking of a particular type of question may change in the context of the contribution of that question to the overall examination in a given year. The Chief Examiner in any given year has the responsibility to determine how best to ensure the fair and accurate assessment of candidates' work and to ensure consistency in the standard of the assessment from year to year. Accordingly, aspects of the structure, detail and application of the marking scheme for a particular examination are subject to change from one year to the next without notice.

Chords: marks are awarded in the first instance for correct and acceptable chords. This is in the context of (i) the chord fitting the melody line at that point (i.e. until the next change of chord indicated by a box) (ii) the preceding chord and (iii) the following chord.

Chord quality: Marks are awarded here for the musical quality of the overall progressions chosen. While the candidate may have chosen chords that “worked” at any point, there may have been better choices. If that is the case, this will be reflected in the chord quality mark.

Chord Progressions - General points

Same chord in adjacent boxes not accepted unless bass changed or 7th added

Accidental and suffix, where relevant must be fully correct for mark to be awarded

Marks for chords not awarded in isolation. Chords must be part of a good progression.

1. V⁷ - V not accepted
2. Vb or V⁷b should generally be followed by I
3. V – ii generally not accepted,
4. ii – I generally not accepted except as approach to Ic in cadential 6/4
5. Cadential 6/4 must be on the stronger of the two beats and at a cadence point
6. Secondary 7ths, if used, must be used correctly i.e. they must be followed by a chord whose root is a 4th higher

Bass Line

No doubling of major 3rd under chord symbol
